

# Health Screening Results in Real Time

With a participant satisfaction rating of 99%, Summit Health, (a Quest Diagnostics Company), is the nation's leading provider of on-site wellness programs. We offer health screenings, immunizations, coaching, and education programs, across all U.S. zip codes and 80 countries. Our health screening programs deliver reliable results using our trademarked Single Station® model.

## Real Time with Summit Health

At Summit Health, we're proud to add our proprietary Real Time Data Collection (RTDC) Solution to our on-site health screening services.

For maximum value from health screenings, every organization needs data to be processed very quickly and accurately so that timely actions can be taken. Promptly acting on the participant "teaching moment" with personalized follow-up wellness interventions such as health coaching, has been proven to trigger positive behavior change and deliver ROI.

## Our Real Time Data Collection Solution provides the following Benefits:

1. Our Partner receives validated data in less than **one minute** after participant's health screening is completed
2. Data Transmitted over a secure Private Network
3. Tablet that supports iOS (Apple) and Android operating systems
4. Fully integrated with Summit Health's proprietary Enterprise Resource Planning (ERP) system, APEX
5. Individual Participant eligibility verified onsite
6. Field level data validation including equation-based (Friedewald) for cholesterol components
7. Participant historical data is available for viewing in a user friendly format on the tablet
8. Dynamic examiner instructions based on screening components and participant's status (e.g. pregnant, pace maker, weight, etc.)
9. Integration of Partner's Health Risk Assessment (HRA), allowing participant completion of the HRA with pre-loaded biometric and vitals data at the health screening or in the convenience of their office
10. Examiner counseling script dynamically customizable based on participant's screening results and available wellness programs and interventions
11. Digital signature via appointment system or on the Tablet
12. Ability to look-up, schedule, and modify appointments at the health screening

**Not all vendor tablet solutions are “real-time.” If your current vendor’s product can’t provide the essential benefits above, then it is not *Real-Time!***
